Dongjoon(DJ) Park

Updated: December 29, 2023

R315, 200 South 33rd Street, Philadelphia, PA moon5756@gmail.com 215-240-2547 https://dj-park.github.io/

Education

Ph.D. in **ESE**, **University of Pennsylvania** *Aug'16-Jul'18, Aug'21-Present*
Advisor: Prof. André DeHon
Research Interests: FPGA design methodology, Tools/CAD for FPGAs, Hardware Acceleration

B.S. in **ECE**, **Carnegie Mellon University** *Aug'12–Dec'15*
Recipient of David Tuma Project Award – Best ECE Capstone Project Award
Graduated with University Honors

Academic Research

Software-like FPGA Development [1] *Feb'23–Present*
Advisor: Prof. André DeHon, University of Pennsylvania
- Fast incremental refinement for FPGA designs, iterating initial design points with parallel compilations
- Created a multiple-clock system with a NoC (400MHz) and compute kernels (200–400MHz)
- Designed a runtime bottleneck identification for HLS dataflow designs using FIFO full/empty counters
- Utilized ML-based classifiers to reduce resource fragmentation for separate FPGA compile technique
- Improved application latency 2.2–12.7× while Design Space Exploration time by 1.3–2.7×

Network-on-a-Chip (NoC) on FPGA [2] *Sep'22–Jan'23*
Advisor: Prof. André DeHon, University of Pennsylvania
- Proposed a novel asymmetric Butterfly Fat Tree NoC in Verilog that excels in unbalanced traffic
- Analyzed throughput and worst case latency in realistic graph workloads and synthetic traffic patterns
- Achieved up to 76% more throughput than existing Butterfly Fat Tree NoC with the similar resource usage

Parallel FPGA Compilation using Hierarchical Partial Reconfiguration [4] *Jan'22–Aug'22*
Advisor: Prof. André DeHon, University of Pennsylvania
- Open-sourced the Makefile/Python/Tcl based FPGA's parallel compilation framework (*link*)
- Provided flexibility in sizes of compile slots for parallel FPGA compilations, utilizing Xilinx Nested DFX
- Demonstrated 1.4–4.9× latency improvement for realistic HLS applications over the previous work

Accelerating FPGA Compilation using NoC and Partial Reconfiguration [6][7] *May'17–Aug'18*
Advisor: Prof. André DeHon, University of Pennsylvania
- Designed packet parser, reassembly buffer, and FIFO modules for NoC interface in Verilog
- Analyzed Xilinx Vivado's compile speed with case studies and revealed the limitations of the vendor tool
- Demonstrated 4.5× compile time speedup for a multi-core design on FPGA over Xilinx Vivado

Detecting Voltage Anomalies in Scan-Testing Environment on FPGA *Dec'14–Oct'15*
Advisor: Prof. Shawn Blanton, CMU
- Implemented a synthesizable, fine-grained voltage sensor on FPGA using carry chains and latches
- Analyzed voltage activities for three different ISCAS'89 circuits in at-speed scan testing environment

Industry Experience

AnaPass, South Korea *Jul'20–Jul'21*
SoC Engineer
- RTL verification of Timing Controller IP for Samsung Tablet display

Korea Advanced Institute of Science and Technology (KAIST), South Korea *Aug'18–Jul'20*
Research Engineer
- Projects on Radar-based fall detector, FPGA-based beamforming system, IQ imbalance calibration

CoMira Solutions, Pittsburgh, PA *Jun'14–Aug'14*
Hardware Engineering Intern
- Optimized hardware implementation of CRC in area and timing using a table-based approach

Course Projects

HW/SW co-design for VGG16, University of Pennsylvania *Nov'21–Dec'21*
- Designed a systolic array based FPGA acceleration kernel for 2D convolution function using HLS
- Integrated multiple FPGA kernels (on AWS EC2 F1) with PyTorch using C++ extension
- Achieved 11–14.8× performance improvement over the SW baseline of 2D convolution function (*report link*)

Publications

[1] REFINE: Runtime Execution Feedback for INcremental Evolution on FPGA Designs
D. Park, A. DeHon
ACM Int. Symp. on Field-Programmable Gate Arrays (FPGA), 2024 – *to appear*

[2] Asymmetry in Butterfly Fat Tree FPGA NoC
D. Park, Z. Yao, Y. Xiao, A. DeHon
IEEE Int. Conf. on Field-Programmable Technology (FPT), 2023

[3] ExHiPR: Extended High-level Partial Reconfiguration for Fast Incremental FPGA Compilation
Y. Xiao, **D. Park**, Z. Niu, A. Hota , A. DeHon
ACM Transactions on Reconfigurable Technology and Systems (TRETS), 2023

[4] Fast and Flexible FPGA development using Hierarchical Partial Reconfiguration
D. Park, Y. Xiao, A. DeHon
IEEE Int. Conf. on Field-Programmable Technology (FPT), 2022
(acceptance rate: 25.2% = 31/123), Artifact Evaluated - Available, Functional, Reusable, Replicated

[5] HiPR: High-level Partial Reconfiguration for Fast Incremental FPGA Compilation
Y. Xiao, A. Hota, **D. Park**, A. DeHon
IEEE Int. Conf. on Field-Programmable Logic and Applications (FPL), 2022
(***Best Paper Candidate***: 7.0% = 9/129)

[6] Reducing FPGA Compile Time with Separate Compilation for FPGA Building Blocks
Y. Xiao, **D. Park**, A. Butt, H. Giesen, Z. Han, R. Ding, N. Magnezi, R. Rubin, A. DeHon
IEEE Int. Conf. on Field-Programmable Technology (FPT), 2019
(acceptance rate: 25.0% = 26/104)

[7] Case for Fast FPGA Compilation using Partial Reconfiguration
D. Park, Y. Xiao, N. Magnezi, A. DeHon
IEEE Int. Conf. on Field-Programmable Logic and Applications (FPL), 2018

Talks

- **Asymmetry in Butterfly Fat Tree FPGA NoC**
  – at FPT 2023, Yokohama, Japan (*talk video*, *slides*) *Dec'23*
- **Fast and Flexible FPGA development using Hierarchical Partial Reconfiguration**
  – at FPT 2022, Hong Kong (*talk video*, *slides*) *Dec'22*
  – at ESE PhD seminar, University of Pennsylvania, Philadelphia, PA (*slides*) *Oct'22*
- **High-level Partial Reconfiguration for Fast Incremental FPGA Compilation**
  – at FPL 2022, Belfast, Northern Ireland (*slides*) *Aug'22*
- **Case for Fast FPGA Compilation using Partial Reconfiguration**
  – at FPL 2018, Dublin, Ireland (*slides*) *Aug'18*

Awards/ Service

- Student Recognition Award, University of Pennsylvania *Apr'23*
- Best Presentation Award, Penn ESE PhD seminar (F2022-S2023) *Apr'23*
- **Samsung Electronics Global Fellowship** with post-graduation employment offer *Oct'22*
- **Best Paper Candidate**, FPL2022 *Aug'22*
- PhD Fellowship, University of Pennsylvania *Aug'16*
- **Best ECE Capstone Project Award** (Project: Neural Networks on FPGA), CMU *May'16*
- University Honors, CMU *May'16*
- Penn ESE PhD students seminar organizer *Feb'23-Dec'23*
- Judge, Research Experience for Undergraduates, University of Pennsylvania *Aug'23*

Teaching Assistant

- **SoC Architecture** (ESE5320), University of Pennsylvania *Fall 2021*, *Fall 2022*
  – Co-authored homework labs on multi-core, SIMD, HW acceleration, HLS, Xilinx Vitis
  – Held C/exam review sessions and weekly office hours for the graduate level course (20-40 students)
  – TA rating for Fall 2022: 3.74/4, the highest of all 7 offerings of the course's history
- **Mathematical Foundations of Electrical Engineering** (18-202), CMU *Fall 2014*
- **Structure and Design of Digital Systems** (18-240), CMU *Spring 2014*

Skills

Hardware Verilog, Vivado, Vitis HLS, Quartus, HDL Simulation tools, OpenCL
Software C++, Python, PyTorch, scikit-learn, Tcl

Relevant Courses

Computer Architecture	Computer Organization	SoC Architecture
HW/SW Co-Design for ML	Advanced Computer Arch. (GPU)	Big Data Analytics
